About Company

We, **M2M** have started our business in the year 2022 with an aim to manufacture, wholesale and trade flawless range of Geosynthetic Products , Polymer Mesh & Fencing Nets. We are serving a large spectrum of top quality products including Building & Civil Construction Meshes, Landscape & Gardens Fence and Packaging Net. These products are available with us in multiple varieties such as wood fencing, metal fencing and aluminum fencing. All our products are fair in price and processed using excellent grade raw components that we source from the reputed vendors of domain. Being as a client-centric organization we believe in giving prompt replies to the customer queries in which we take the help of our professionals. We also provide after sales services.

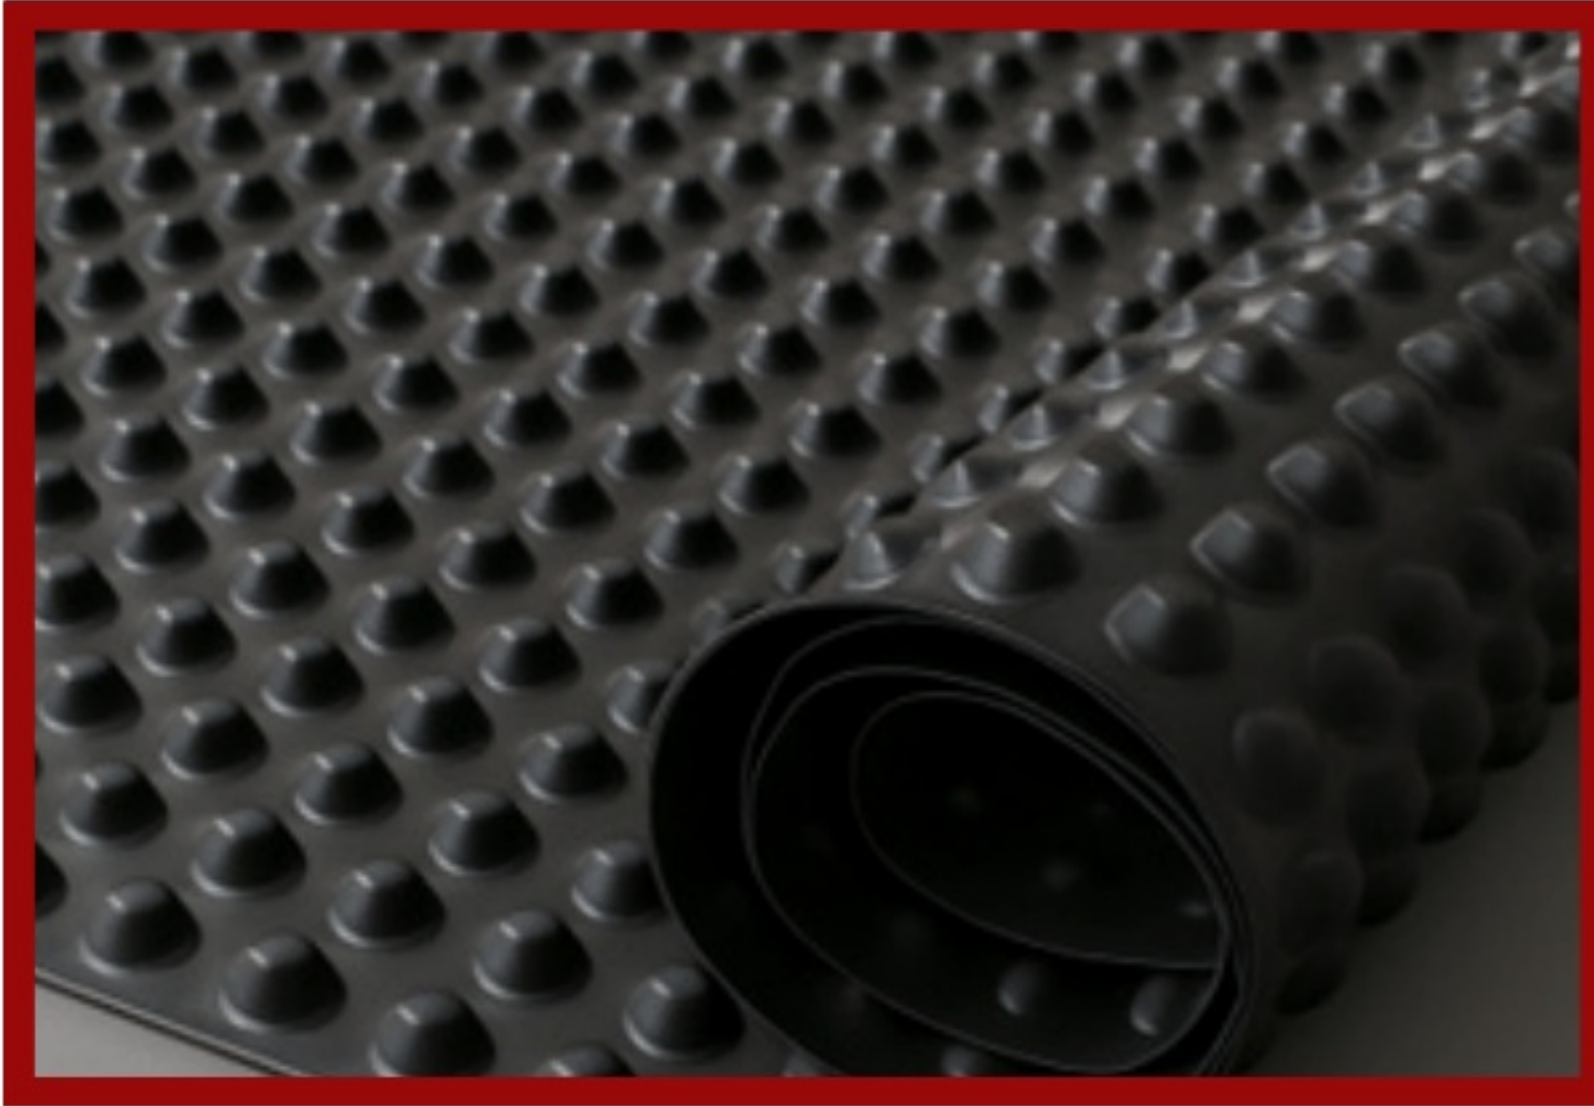

Mr. Vikram Prajapati (CEO) has supported us greatly and illuminated our path by providing continual guidance in this highly competitive field. He secures immense knowledge about the Geosynthetics & construction products & equipment. Also, he has completed his education from the top business school and worked with many reputed brands of construction industry.

Our Vision & Mission

- To deliver innovative and sustainable engineering solutions.
- To be a trusted leader in infrastructure and geosynthetics
- To deliver safe, efficient, and compliant engineering solutions through continuous innovation.
- To provide end-to-end services with assured quality, reliability, and on-time project execution.
- To contribute to nation-building through sustainable and value-driven infrastructure development

M2M Products

HDPE Dimple Board

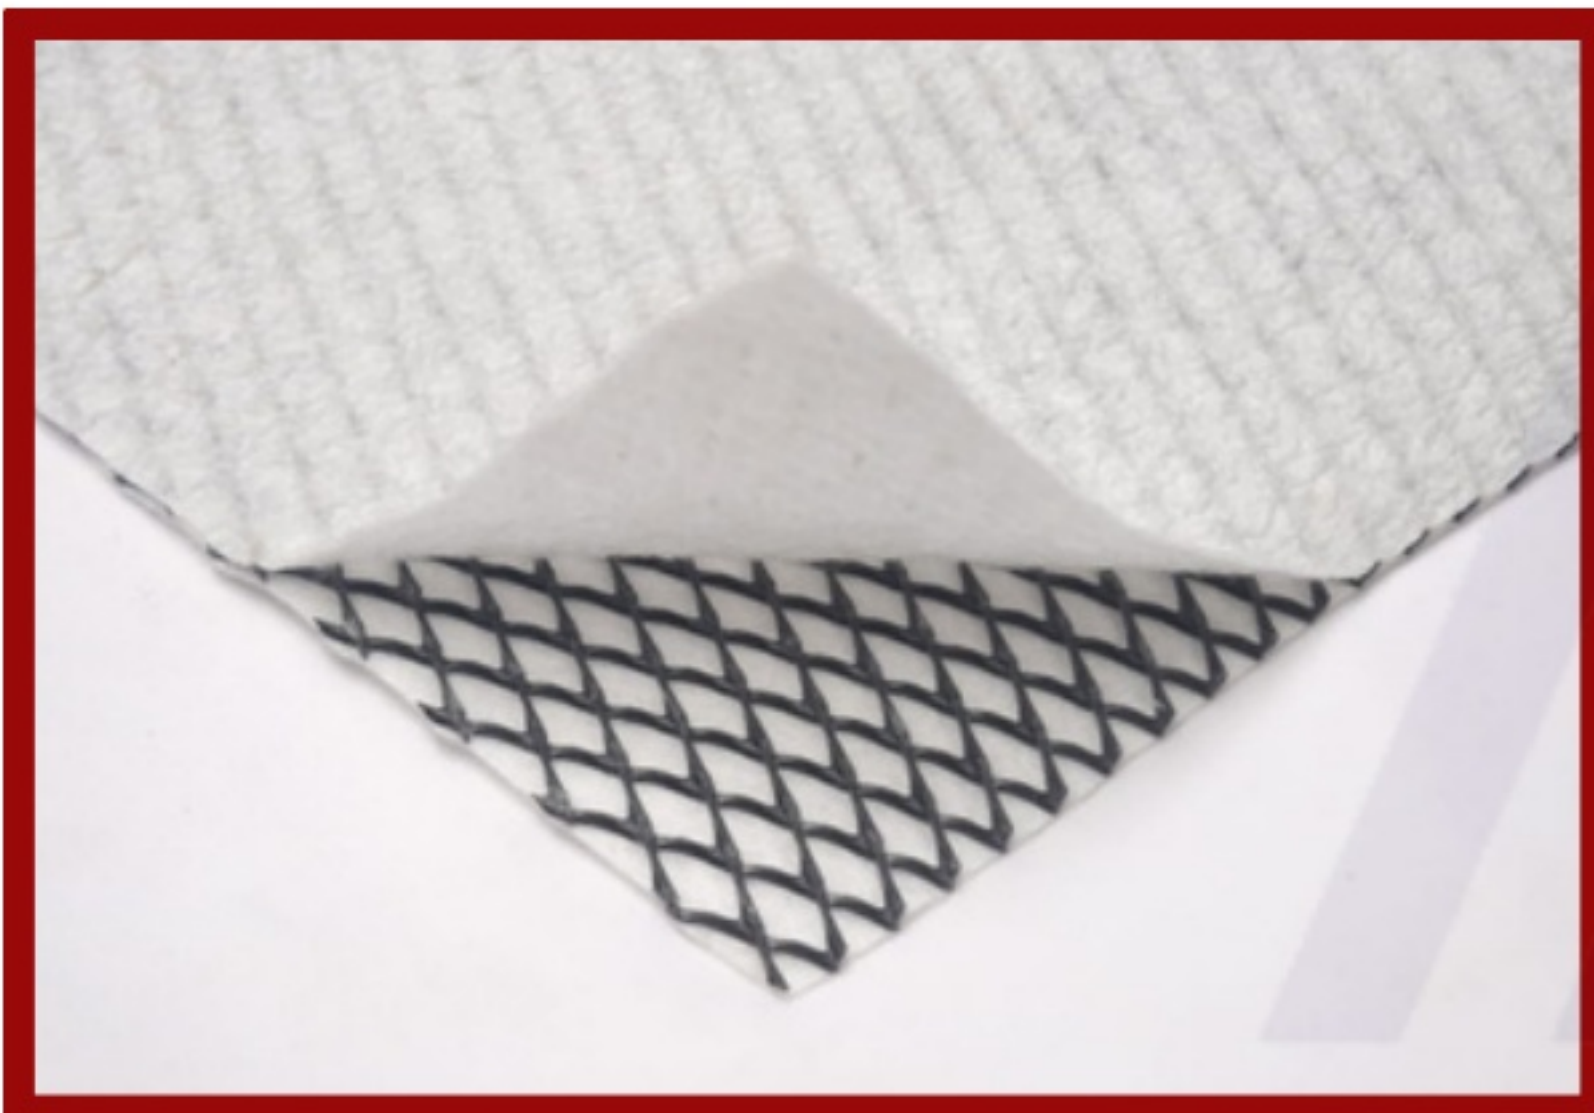

Specifications :

400-1300 GSM

Size: Width 2.3 MTR, Length 20MTR

Color: black

Applications: Basements, Retaining Walls, Foundations, Roof Gardens, Tunnels

Drainage Geocomposite

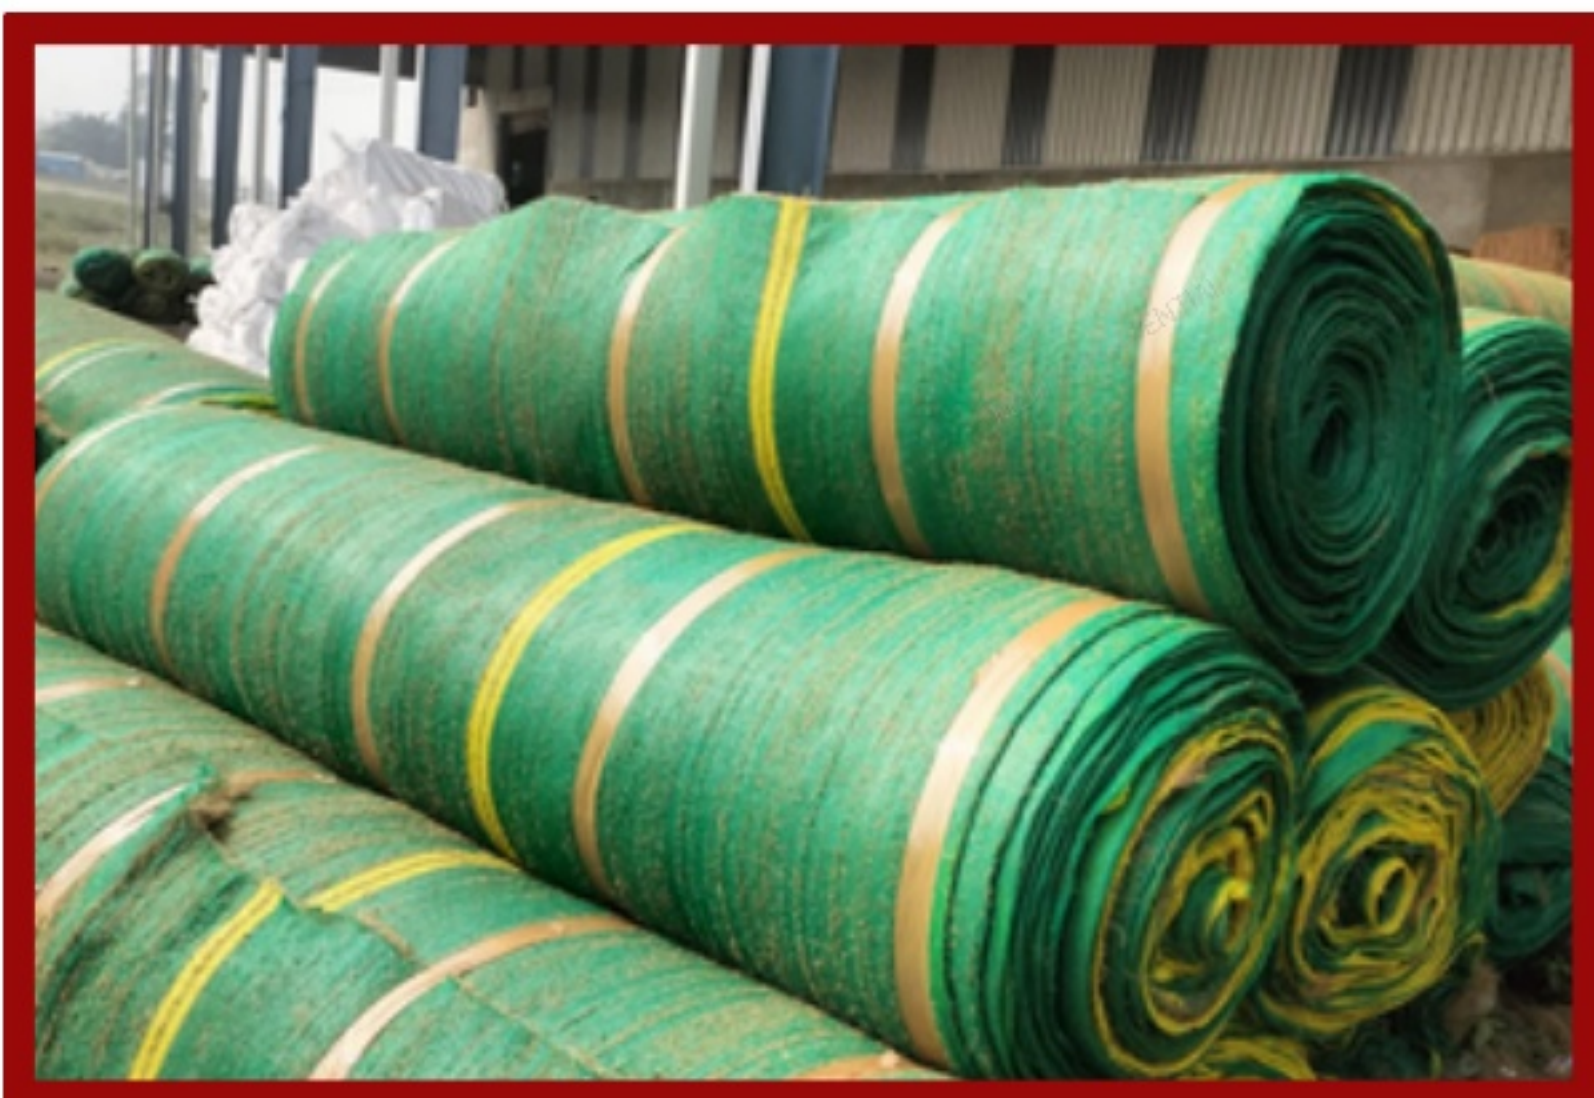

Specifications :

710-1200 GSM

Size: Width 2 MTR, Length 50MTR

Color: White, Black

Applications: Basements, RE-Wall, Retaining Walls, Foundations, Road & highways, Landfills, Railways

Erosion Control Mat Green

Specifications :

450-900 GSM

Size: Width 2.5/3 MTR, Length 50MTR

Color: Green

Applications: Slope Protection, Construction Sites, Shoreline and Coastal Protection, Reclamation of Disturbed Land

Erosion Control Mat Brown

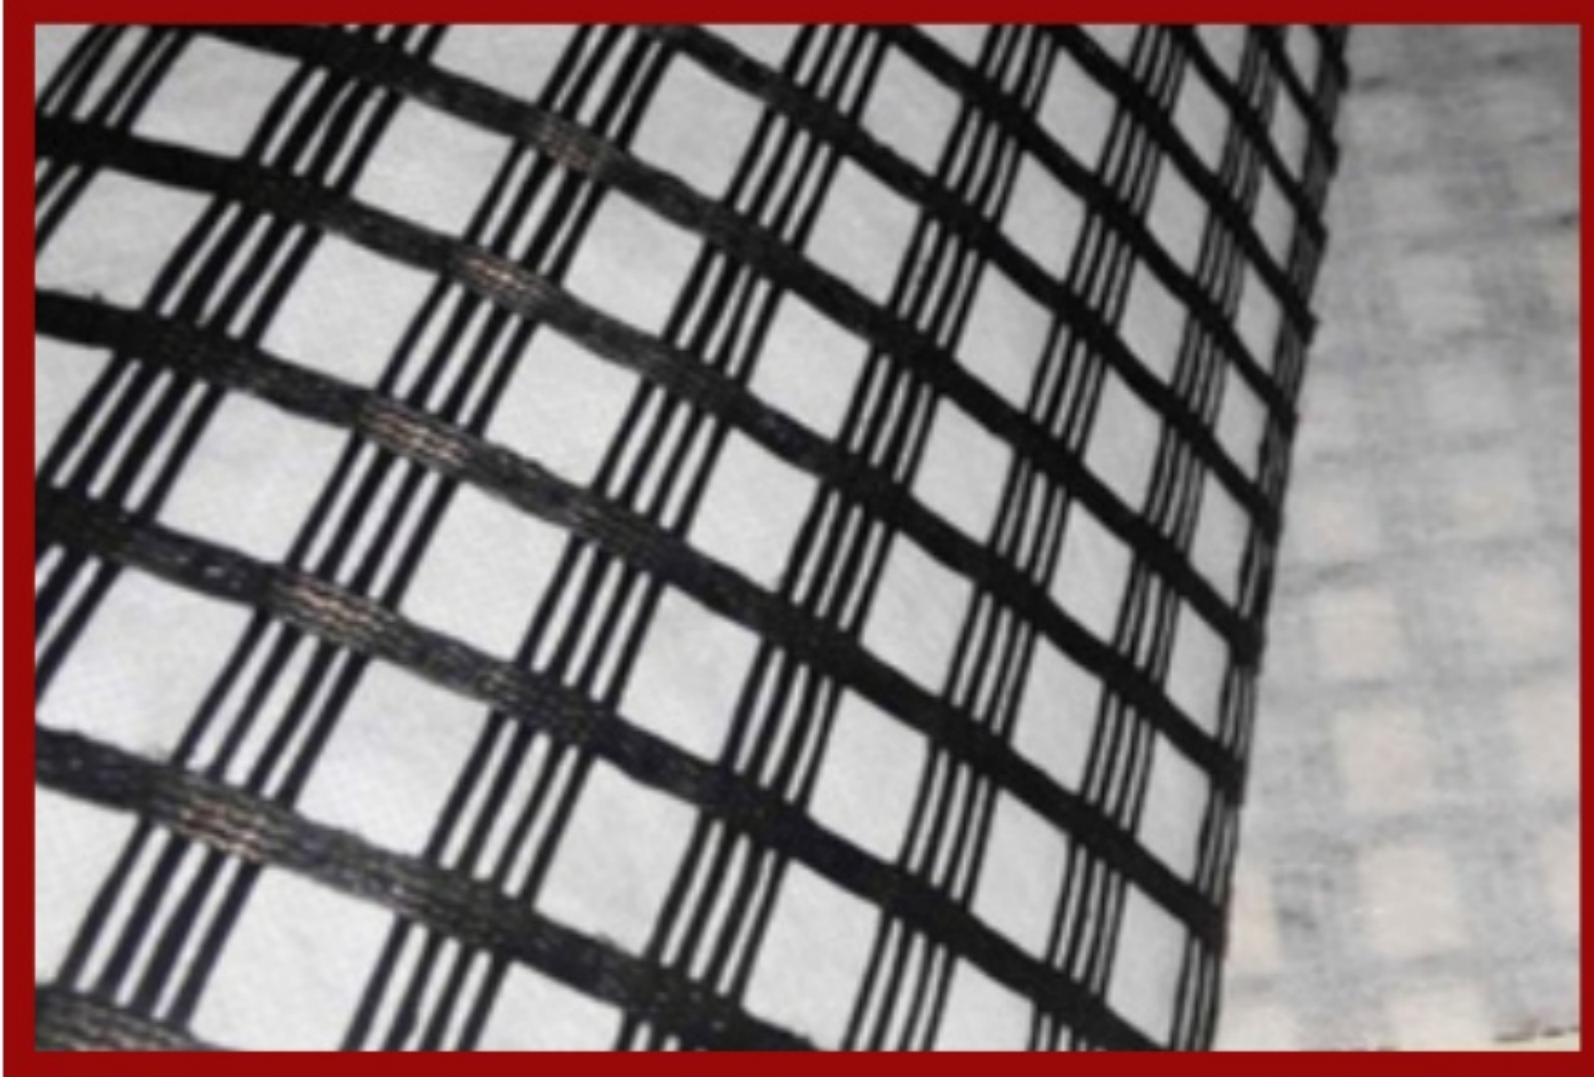

Specifications :

450-900 GSM

Size: Width 2/2.4 MTR, Length 50MTR

Color: Brown With Black PP Thread

Applications: Riverbank and Canal Protection, Slope Protection, Drainage Channels and Ditches, Landscaping and Parks

Polyester Geogrid

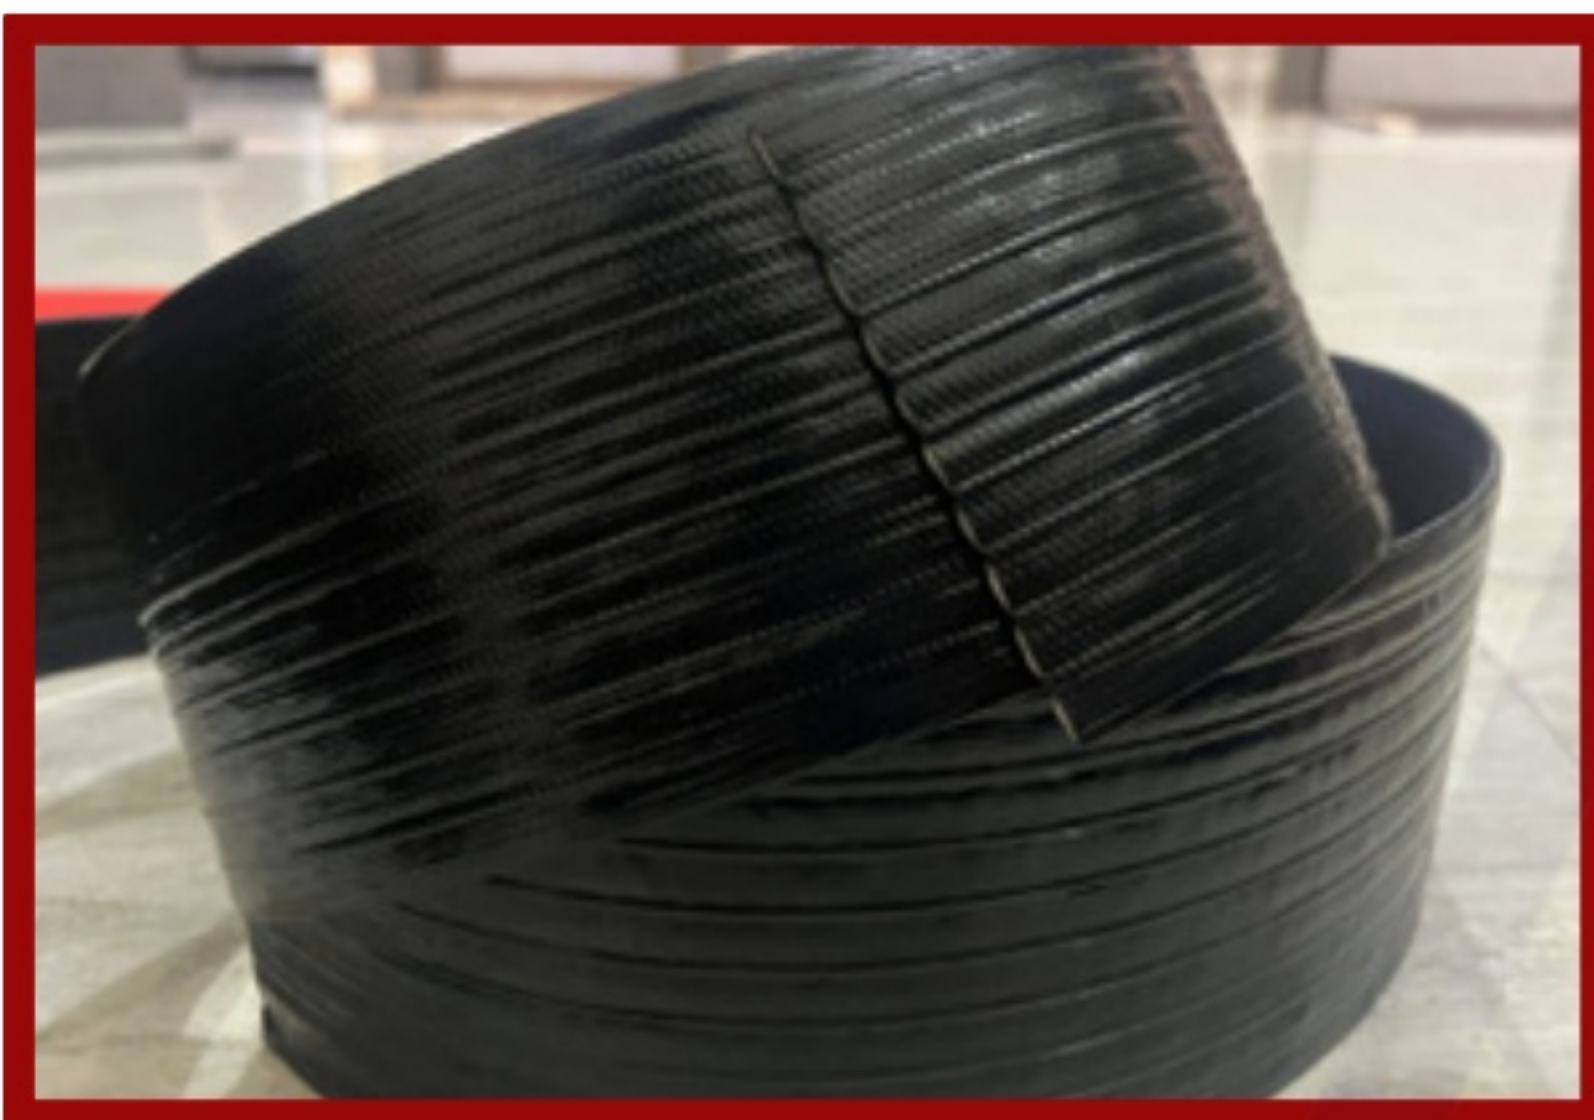

Specifications :

20KN - 350 KN

Size: Width 3/5 MTR, Length 100-200 MTR Customise

Color: black

Applications: Slope Stabilization, Road & Highways, Railway Track Reinforcement, Bridge Approach Embankments

Geostrap

Specifications :

20 - 100 KN

Size: Length 100 MTR

Color: Black

Applications: Reinforced Soil Retaining Walls, Bridge Abutments, Foundation Improvement, Embankment Reinforcement

HDPE Geocell

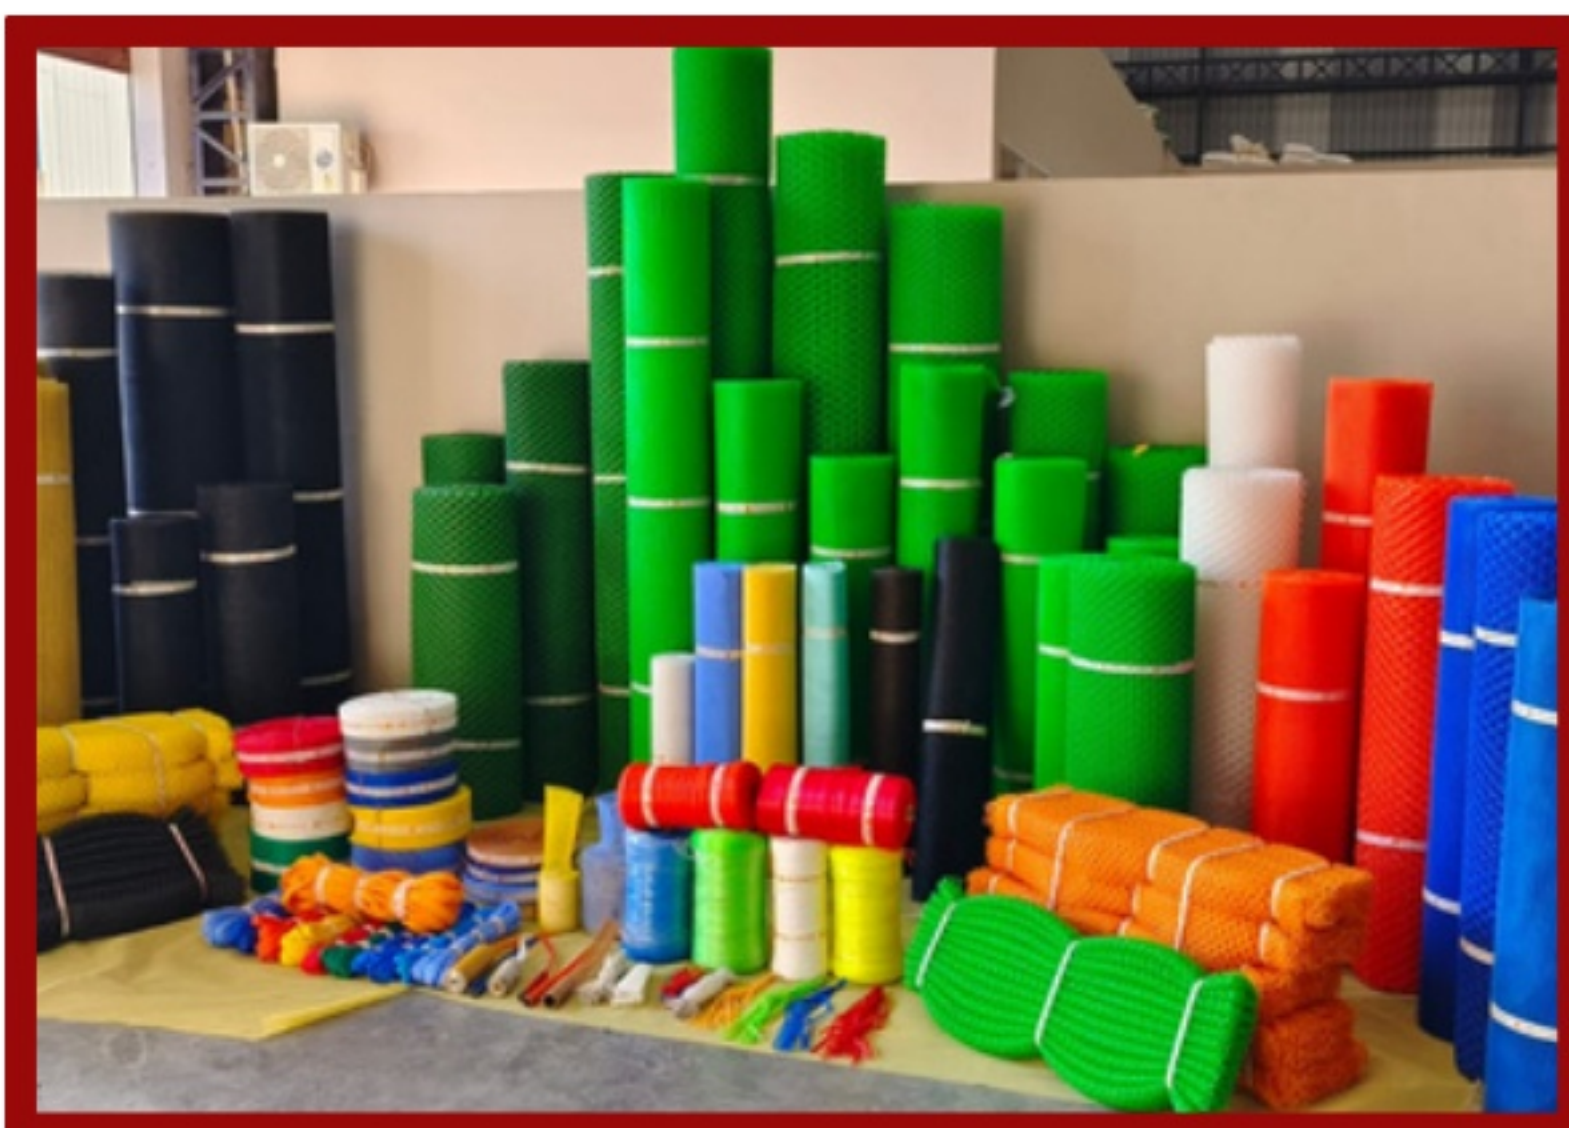

Specifications :

Cell Height: 75/100/125/150/200/250 GSM

Thickness : Thickness 1.3-2.0MM

Color: Black

Applications: Road and Highway Construction, Slope Protection, Channel and Canal Protection, Parking Areas and Unpaved Roads

Plastic Netting

(Packaging Net & Protective Sleeves)

HDPE tree guards, packaging nets, and plastic netting are polymer-based mesh products manufactured from High-Density Polyethylene (HDPE). They are lightweight, durable, and widely used for tree protection, packaging, agriculture, construction, and erosion control.

Our Services

1. Manufacturing

- Manufacturing of high-quality Geosynthetic ,Packaging & Plastic Netting Products such as - Geocell, Erosion Control Mats, Geostap, Drainage Geocomposite, HDPE Dimple Board, Geogrid, Geobag, HDPE Tree Guards , Shade Net,Fencing & Packaging Nets
- Advanced production facilities ensuring consistency and strength

2. Design & Execution

- End-to-end design and execution for infrastructure and environmental projects
- Focus on quality, safety, and timely completion

3. RE Wall (Reinforced Earth Wall)

- Design, supply, and construction of RE wall systems
- Executed under qualified engineering supervision

4. Erosion Control & Slope Protection

- Solutions for Road ,Riverbank protection, embankment stability, and hillside erosion
- Long-term protection against soil loss and water damage

5. Waterproofing & Plastic Netting

- Geomembrane lining for canals, ponds, and industrial projects
- Leak-proof & chemical-resistant material dimple protection
- Manufacturing and supply of durable packing nets for fruits, vegetables, agriculture green shade net & HDPE Tree Guards.

M2M Projects

Applications

Re-Wall Solution

- Highway and railway embankments
- Bridge abutments & Urban Infrastructure
- Hills and erosion-control projects
- Re-Wall in road construction: eco-friendly, durable, moisture-resistant panels offering noise reduction, easy installation, and long-term cost savings.

- Prevents soil erosion on slopes, embankments, and exposed areas
- Supports vegetation growth for long-term natural stability
- Protects riverbanks, canals, and drainage channels from soil loss
- Ideal for highways, landscaping, restoration works, and high-flow zones

Erosion Control

Dimple Board

- Provides effective drainage and reduces hydrostatic pressure
- Protects waterproofing membranes from damage
- Ensures controlled water flow through dimple channels
- Ideal for foundations, basements, tunnels, and green roofs

How It Works

1. Understanding Client Requirements

We assess client needs, project goals, and site conditions to define the best approach.

2. Design & Planning

Our expert team develops efficient, practical designs with detailed schedules and resource plans.

3. Execution & Implementation

Projects are executed with skilled manpower, quality materials, and strict safety control.

4. Testing & Commissioning

All systems are tested, verified, and optimized for reliable performance.

5. After-Sales Support

We provide ongoing maintenance and technical assistance for long-term reliability.

Our Units

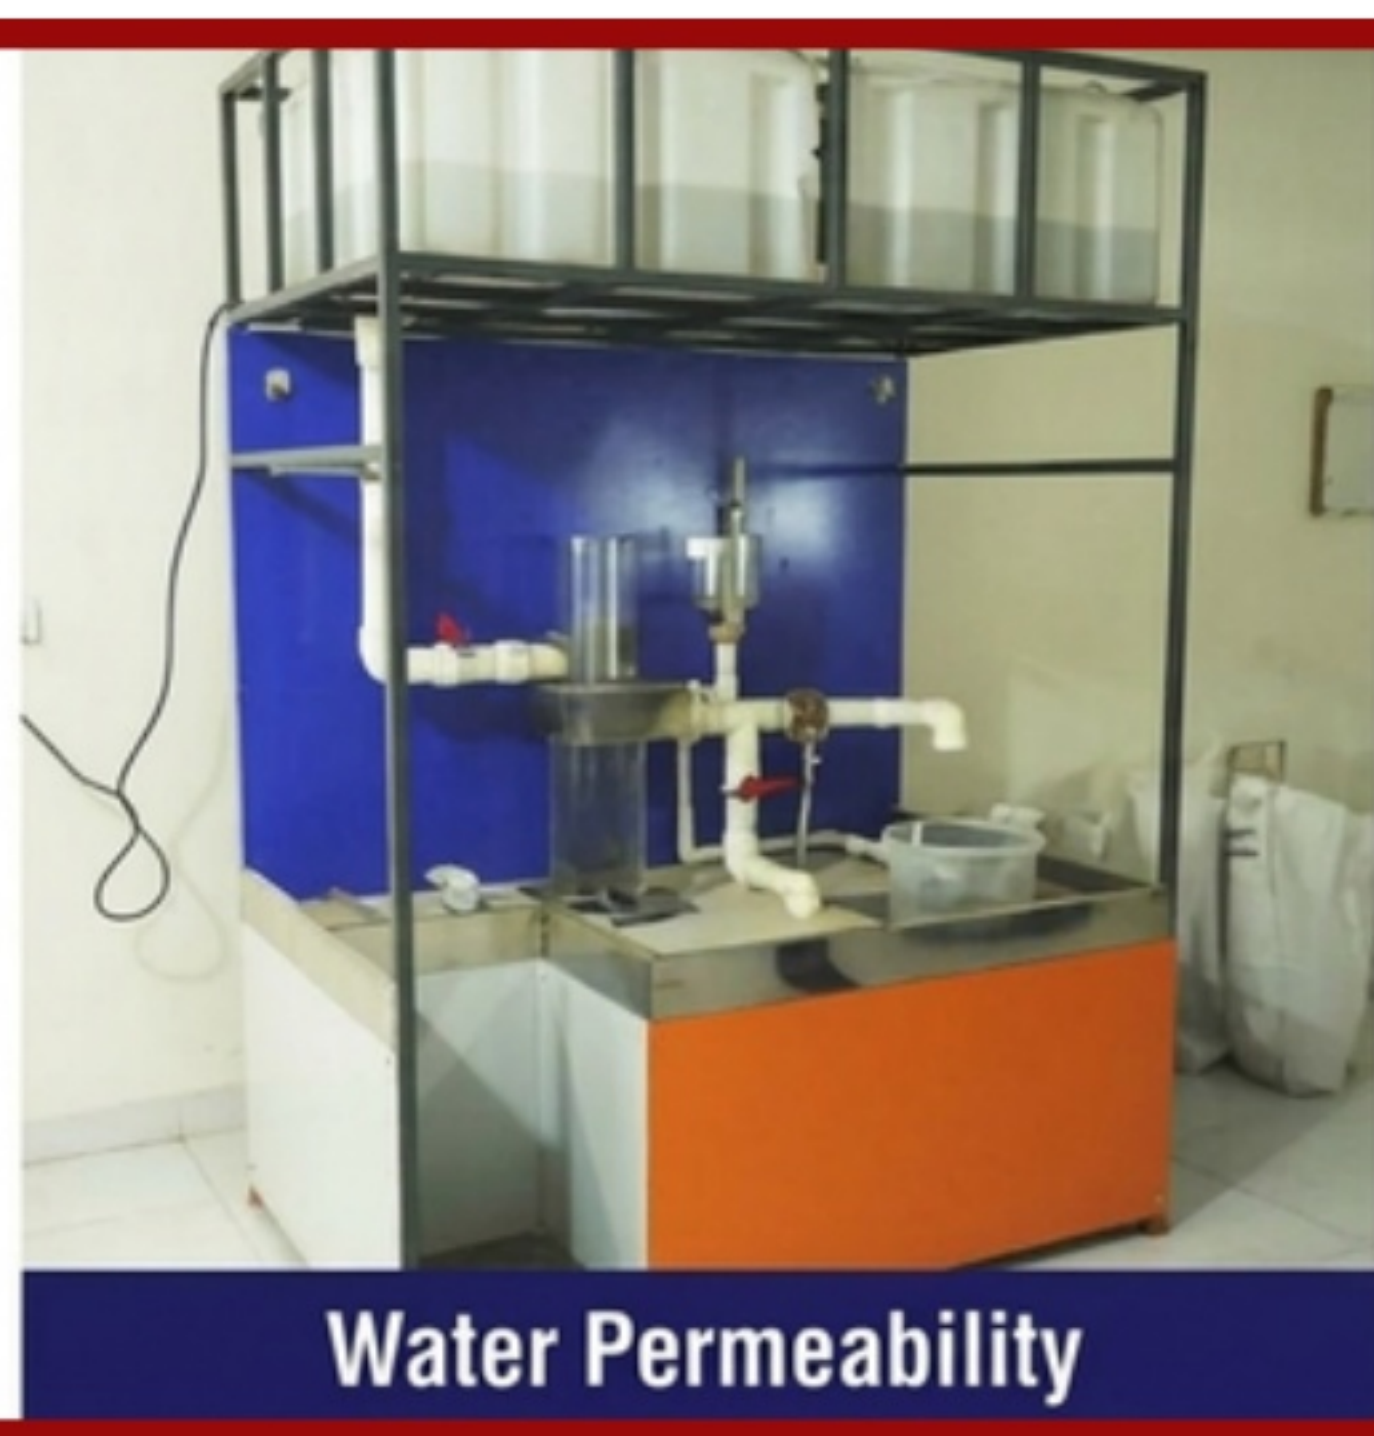

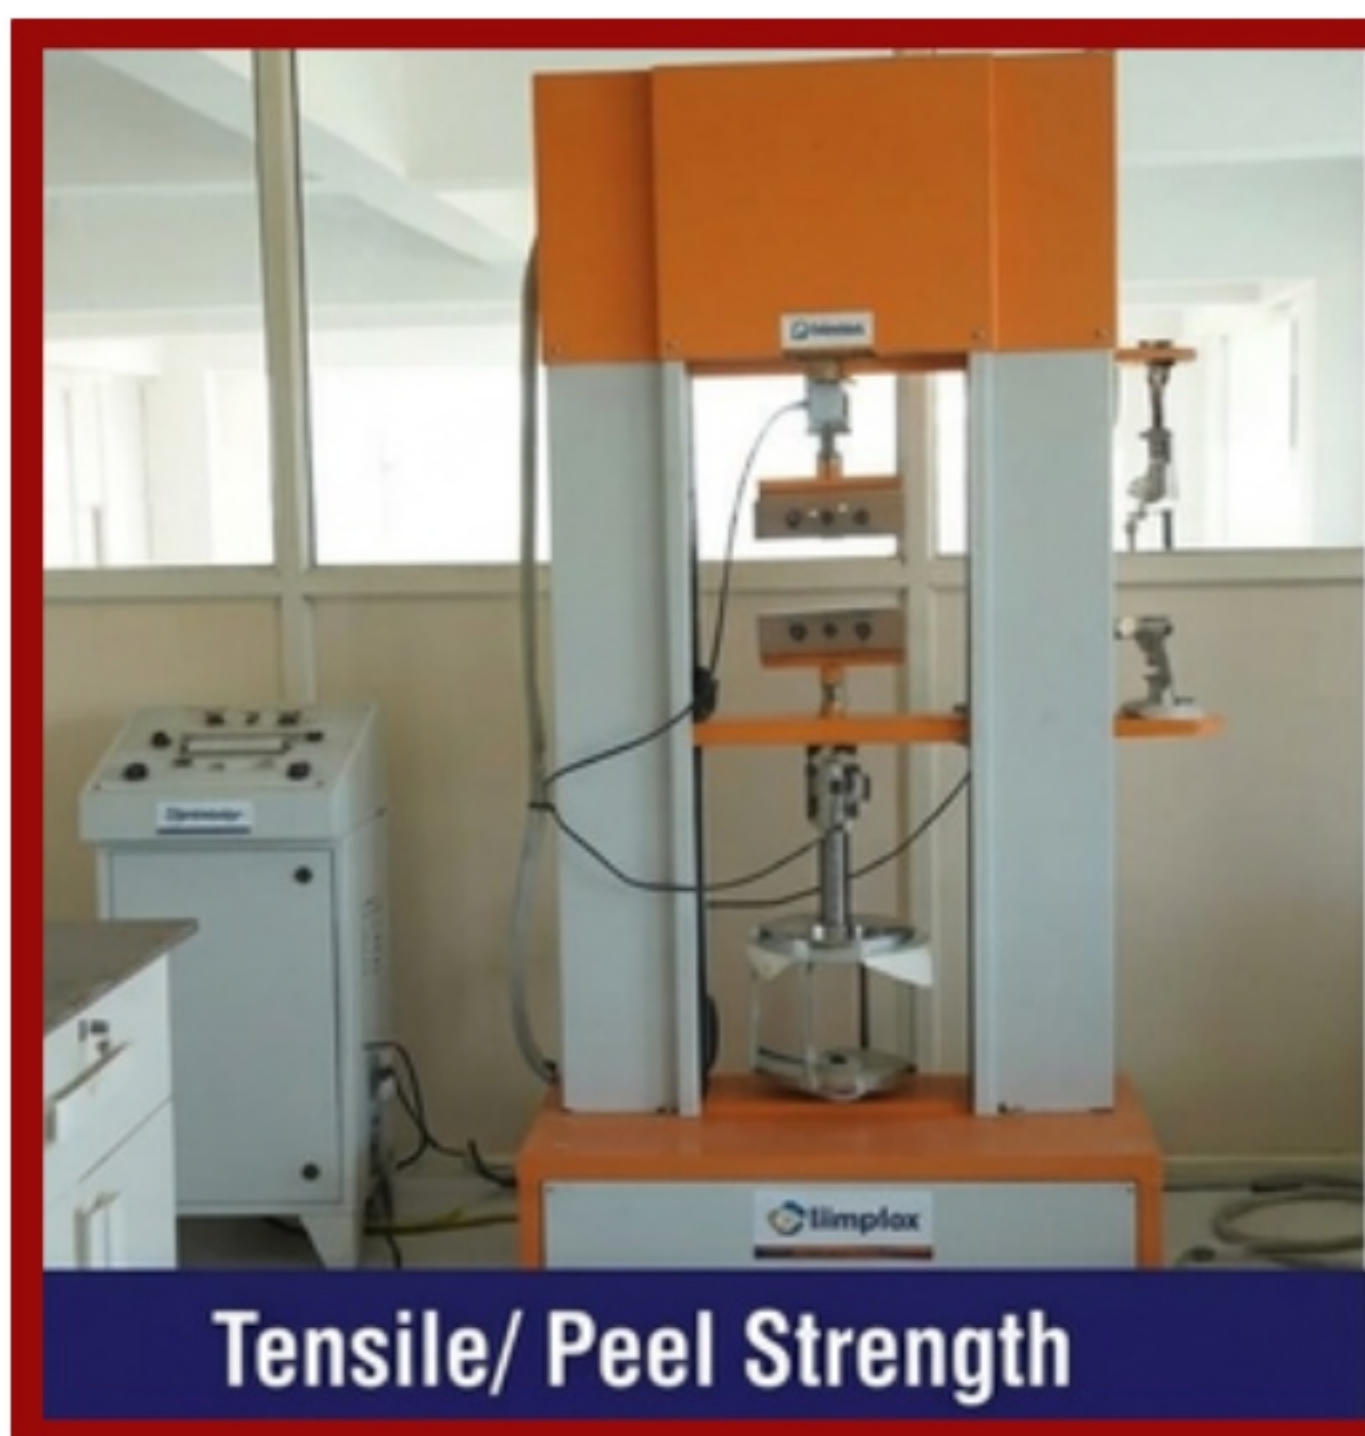

Plant & Machinery

Stockyard

Quality Control & Testing Lab

Our Strength

1. End-to-End Solutions

M2M Engineering offers complete integrated services, covering manufacturing, design, and execution, ensuring seamless project delivery from concept to completion with high efficiency and quality.

2. Advanced Technology

Equipped with modern production facilities and stringent quality control, M2M Engineering leverages advanced technology to deliver precision, consistency, and superior construction outcomes.

3. Strong Technical Expertise

Our team of experienced engineers ensures IRC and MORTH compliant designs, applying deep technical knowledge to deliver safe, efficient, and reliable infrastructure solutions.

4. Building Trust, Delivering Value

We earn trust through integrity, consistent quality, and transparent communication. Our customer-first approach and long-term commitment ensure strong and reliable partnerships.
